# *Customer Background*

- Customer: Hisushi (chain store in Taiwan)
- Location: Retail Store, Department Store, etc.
- Application: Point-of-Sale (POS) system

# *Requirement and Challenges*

The customer is looking for a reliable quality POS system to replace the old machines. It can reduce the maintenance cost with industrial-grade panel computer.

## **Challenges:**

Due to dust concern and limited space, the customer needs a fanless, compact size and lower power touch panel computer. The POS system must have good quality and user-friendly design.

# *Solution*

The GOT615-801 is a 15.6" WXGA TFT wide screen fanless touch panel computer optimizes slim outfit with front bezel measuring only 14 mm in thickness. Featuring IP65-rated aluminum front bezel and supreme styling, the robust unit is a perfect model for POS application in limited store environment. Powered by dual core Intel® Atom™ processor D525, GOT615-801 delivers excellent computing performance at remarkably low power consumption. The benefits of slim & stylish design, this all-in-one touch panel computer to enhance interactive experience to users.

# System Configuration
