Introduction

ORing's Transporter™ series managed Ethernet switches are designed for industrial applications, such as rolling stock, vehicle, and railway applications.   The TPS-3082GT-M12-BP1 is a managed PoE Redundant Ring Ethernet switch with 8x10/100Base-T(X) P.S.E. and 2x10/100/1000Base-T(X) ports which is specifically designed for the toughest and fully compliant with EN50155 requirement.   With completely support of Ethernet Redundancy protocol, O-Ring (recovery time < 10ms over 250 units of connection), Open-Ring and MSTP/RSTP/STP (IEEE 802.1s/w/D) can protect your mission-critical applications from network interruptions or temporary malfunctions with its fast recovery technology.   Another Open-Ring technology is also supported which can applied for other vendor's proprietary ring.   TPS-3082GT-M12-BP1 also supports Power over Ethernet, a system to transmit electrical power, along with data, to remote devices over standard twisted-pair cable in an Ethernet network.   Each TPS-3082GT-M12-BP1 switch has 8X10/100Base-T(X) P.S.E. (Power Sourcing Equipment) ports.   P.S.E. is a device (switch or hub for instance) that will provide power in a PoE setup. TPS-3082GT-M12-BP1 EN50155 Ethernet switch use M12 connectors to ensure tight, robust connections, and guarantee reliable operation against environmental disturbances, such as vibration and shock.   TPS-3082GT-M12-BP1 can be managed centralized and convenient by a powerful windows utility ~ Open-Vision.   In addition, the wide operating

temperature range from -40 °C to 70°C can satisfy most of operating environment.   Therefore, the switch is one of the most reliable choices for rolling stock and highly-managed Ethernet application.

Open-Vision

ORing's switches are intelligent switches.   Different form other traditional redundant switches, ORing provides a set of Windows utility (Open-Vision) for user to manage and monitor all of industrial Ethernet switches on the industrial network.
